

The ALTEL technology is there for your campsites!

Get ready!

Choose the smart card now.

**For a similar cost to existing technologies,
get your hands on more than an access system!**

Be prepared for the future by opening the gates to the electronic money today.

With this chip, users carry their access privileges and all relevant information for its use.

MINIMAL INSTALLATION COSTS:

- No excavation or digging is necessary preserving your environment
- No network wiring
- No telecommunication equipment
- No connection is necessary between the gate and the main office without giving up control on the security
- Suited for any existing gate model or brand

A three key user friendly navigation allows you to consult the various functions of the reader such as access history directly on the spot without having to use a computer.

It helps regular campers and those (early birds) who have made their reservation prior to their arrival to move along freely.

Incorporating a ruggedly designed gate from **AUTOMATIC SYSTEMS** for worry-free operation even during peak camping season.

ELECTRONIC MONEY

The next revision is scheduled to include support for "electronic cash". For example, customers will be able to deposit \$50 on their card and then rent boats or buy logs. Therefore campers wouldn't have to bring money with them anymore! For an higher level of security, a PIN code will be required to authorize all transactions.

FEW FEATURES:

- Timed anti-passback
- Plastic access cards
- Secure key encoding
- Unlimited activated cards
- Up to 32 access points
- Reservations could be done several months in advance
- Multilingual graphic indicator showing the campers name and site number
- Arrival and departure time frame control
- The card is automatically cancelled after expiry date of the stay
- Variable rental period programming (seasonal or daily)
- Reusable card under certain conditions*
- Due to its low cost, no deposit will be required for the card
- An SQL database allowing integration with existing ODBC compliant management systems.

* The card must be undamaged (not be damaged mechanically) and the electronic money should not be activated. Other conditions could apply.

Actual size

The technical sheet of the BL-229 gate is available on automaticsystems.com
